 - It is advisable to paste both these maps near your study table / in your room.
 - Bring one copy of each to the school securely tied in file/ folder.

WEEK 6: THEME – LIFE SKILL

Topic- Realize your potential

Introduction:

God has created this world and all the creatures have different kind of skills. Almost all the people in the world have some peculiar qualities needed in different aspects of social development. But most of them do not realize their potential and fail to utilize it

properly. Especially students should realize their potential and they should try to utilize it in a better way.

Sometimes a student good in studies does not participate in academic competition due to fear of failure. He actually does not realize his potential that may bring success for him. The fear of failure prevents us from accepting challenges. As a result we fail to show our potential before people.

If you read the success story of many great personalities, you will find that they had realized their potential in the concerned field and made continuous efforts to realize their dreams. For example:-**Sachin Tendulkar** had realized his potential as a batsman when he was in school. He knew that he could do better in cricket. He decided to become a batsman and began to develop his batting skills. If he had not realized his potential he would not have become such a great batsman of world.

Write about any great personality of India who recognized his/her potential in a particular field and became very popular in that field.

Have you ever tried to recognize what kind of skill is hidden inside you? If yes, what is it? Write in brief.
